Tiger cub found dead in MP's Bandhavgarh: Two months after the death of a tigress, one of its three cubs was found dead two days ago in an enclosure in Madhya Pradesh's Bandhavgarh Tiger Reserve, officials said on Tuesday. "Mangled remains of around seven-month-old cub were found in the enclosure spread over an area of 42 hectares," Reserve's deputy director K S Alawa over telephone. He said the cub had been killed by a tiger in the enclosure, adding that it was hard to identify its sex given that a few body parts of the striped cat were found. PTI
