**BANGLORE:** Sixteen tigers including five cubs at Bannerghatta Biological Park (BBP) which were critically ill are now out of danger, B K Singh, Principal Chief Conservator of Forests and Chief Wildlife Warden told *Deccan Herald*.

He said the animals will be released into safari within a week.

"They are out of danger, but have been kept under observation for few more days," he added.

The animals that have recovered are Annu, Gowri and her three cubs, Yashoda and her two cubs, Arya, Inchara, Kalpana Chawla, Raja, Rani,

Lava and Amar.

However, Minchu is still critical and is under constant medical care as she is battling for her life.

"She is still a cause of concern for us. For the last three weeks she has been on fluid therapy and is on force-fed," said BBP authorities. Following an expert advice she is being provided with imported renal diet so as to reduce the pressure on her kidney.

Dr G Pampapathi visited BBP and checked the condition of Minchu personally and offered necessary suggestions and guidance.
